

## Level: Silver

### OPERATION FUTUREKIDS UNITS SILVER (5 -8 YEARS OLD)

**LOG ON** In Log On, students use desktop publishing to solve puzzles and mysteries while learning about computers. They combine text and graphics effectively to create projects including a crossword puzzle, a computer rules sign, a color-coded puzzle, a cover for their printed work and a congratulatory card. The Internet is accessed to learn more about computers.

**WORLD WILDLIFE** In World Wildlife, students help a zoo by using a pre-database application to group and organize a map, workers, creatures and souvenirs. They also identify patterns and sort animals by size and color.

**WORLD'S FAIR** In World's Fair, students visit an international fair and use their wordprocessing and graphics skills to design various components of the exhibition such as maps, signs, tickets, carnival rides and attractions. A storybook of their adventures is also created.

**WORLD CURRENCY** In World Currency, students help a toy store while learning about currency. They use a calculator and learn how to use a spreadsheet to compute totals and create charts.

**TIME CAPSULE** In Time Capsule, students use graphics, text, sound and animation to create a time-capsule presentation. Each lesson focuses on a different familiar environment. The children select objects that represent how they live in the present.
