

The Support

CORPORATE TRAINING AND SUPPORT IS JUST THE BEGINNING

After joining the FUTUREKIDS organisation, you'll attend a comprehensive and intensive training programme at our headquarters. There you'll become familiar with our product, marketing and implementation strategies for each component of the FUTUREKIDS business. From business planning to pricing and staffing, you'll leave with the knowledge you need to build your business.

Following your initial training, you'll receive follow-up consulting and support during the initial launch and ongoing development of your business. Franchisee meetings as well as an annual international convention are also opportunities to stay in touch with the latest development in the business and network with your peers.

As part of our ongoing support, FUTUREKIDS has developed its own web portal, linking our students, parents, school and franchisees with each other and corporate management.

The leading edge system features exclusive franchisee and school forums allowing FUTUREKIDS affiliates, staff, teachers and member schools to interact and share information on all elements of the business.

Everything from marketing materials, press releases, curriculum updates and more are available online, 24 hours per day, and are updated continuously.

FUTUREKIDS continues to invest in the ongoing development of products, programmes, tools and

systems that meet the need of the growing technology education market. With our growing Franchise network and support system, we continue to set the standard for providing computer education worldwide.
